Material Management ERP System

A management system to provide inventory visibility throughout inbound, receiving, order processing, storage, shipping and billing processes.

Key Functionality:

- Provides inbound, in-terminal and outbound visibility to inventory at the SKU level
- Gives a headquarters and terminal view of product on hand or in-transit
- Handles bulk and break products
- Tracks inventory levels and bin or bay location
- Centralized rate and customer information maintenance
- Scale interface for accurate billing and inventory
